Selenium Python | PyTest

Today we will learn:

What is PyTest
―――――――――――――――――――

How to install PyTest
―――――――――――――――――――

How to use PyTest with Selenium scripts
―――――――――――――――――――

How to run tests using PyTest
―――――――――――――――――――

test_*.py
*_test.py

Note
File name : **test_*.py or *_test.py**
Class name should start with **Test**
https://docs.pytest.org/en/latest/contents.html

1. Create a simple test script
2. Install Pytest
   pip install -U pytest
   pytest --version
3. Rename python file to add test_
4. Create 3 methods: setup, test, teardown
5. Run from terminal
   python -m pytest
   py.test
   pytest

```
pytest filename
pytest -v
```

Fixtures - used to manage tests in PyTest

Function
Class
Module
Session

Note
File name : **test_*.py or *_test.py**
Class name should start with **Test**
